AMENDMENT

S I R:

In response to the Office Action dated September 11, 2002, please amend the above-identified patent application as follows:

In the Claims:

Please cancel claims 10, 12 and 14.

Please amend claims 9, 11, and 13 as follows:

9. A projection-type display device, comprising:  
a reflection-type image-forming means for spatially modulating and reflecting illumination light of a predetermined plane polarization to emit an optical image with a plane polarization rotated with respect to the plane polarization of the illumination light,  
a projection optical system for projecting said optical image,  
a light source for emitting said illumination light, and  
a light separating means for emitting said illumination light emitted from said light source toward said reflection-type image-forming means and emitting said optical image emitted from said reflection-type image-forming means to said projection optical system,
